ProSolution Plus has been shown to help reduce premature ejaculation by up to 64%

Improvement in Premature Ejaculation

Subjects predominantly suffering from premature ejaculation demonstrated 64% improvement in index of premature ejaculation against 25% improvement in placebo

Researchers tested 148 men in a two month triple-blind study. Half the study participants took the ProSolution Plus formula. The other half took a placebo at similar dosage.

All of the men were in reasonable health, between 21 and 60, and suffered from mild to moderate erectile issues, premature ejaculation and/or low interest in sex.

The ProSolution Plus formula includes:

Tribulus Terrestris - Natural Help For Men With Erection Issues

A traditional chinese herb long used as an aphrodisiac. Studies reveal that tribulus terrestris relaxes the corpora cavernosum and shows significant increases in intracavernous pressure, offering natural help to men with erection difficulties.

Asteracantha Longifolia - Enhanced Attraction to Sexual Partners
